WE SUPPLY THE TOOLS FOR MODERN FARMING

WHEN the early pioneers first tilled the fertile soil that surrounds Mount Pulaski, all they needed was a team of horses, a plow, a few hand tools, and lots of energy for the hard labor necessary to plant and harvest their fields.

TODAY'S modern farming methods, with large acreages maintained by one man, demands dependable, easy-to-handle machines to do the work that once was hand labor.

IT is our business to supply and maintain these modern implements, and to make certain the farmer gets just the right machine for his particular needs.

WE enjoy the many friendships we have made since 1942 when we first started serving farmers in this area. Now, on the occasion of the City's 125th Anniversary, we offer our Sincere Greetings and Congratulations to every resident of the area.
